

SolidLux

Instant Coating

The only
floor coating for line marking
at the speed
of light

Some places never get a rest. In areas where activity continues 24/7, installing floor markings is a challenge. After years of research, a ground-breaking innovation has now arrived: a rapid action floor coating that is fully cured and 100% load resistant, immediately after installation. SolidLux Instant Coating. Minimum disturbance, maximum time efficiency.

- ✓ Rapid installation
- ✓ Instantly cured
- ✓ Immediately load resistant

SolidLux has made the unthinkable possible

SolidLux Coating works at the speed of light. Literally, because this patented coating system cures instantly by exposure to UV light.

The area remains accessible while work is in progress with new line markings fully load resistant both chemically and mechanically within minutes.

The ultimate solution for public spaces, production halls and cold storage and deep-freezing cells. With SolidLux, every floor can be treated rapidly to meet relevant safety and workplace standards with only a minimum of disturbance.

Advantages

- significant time gains
- evacuation or shut-down not necessary in most cases
- minimum or no delays or loss of turnover
- suitable for use on floors in cold storage
- instantly resistant to mechanical and chemical impact
- suitable for indoors and outdoors
- anti-slip finish available
- no taint

The products

The complete SolidLux system consists of the products below. These products have been especially developed for curing by exposure to UV light and are immediately load resistant.

Topcoat

- > heavy-duty topcoat
- > excellent long-life even outdoors
- > cleans perfectly
- > solvent-free

Basecoat

- > suitable as primer or intermediate layer
- > strong adhesion
- > solvent-free

Adhesive

- > solidifies porous substrates
- > easy to work
- > dual cure technology

Glue

- > state of the art Silane UV-technology
- > strong adhesion
- > solvent-free

The colours

SolidLux is available for line marking in seven standard colours. Other colours available on application. Note: colours shown may vary from the printed result.
